

## **Love Your Parents**

Always be thankful to god for what you have. Believe in everything, If you believe this will happen then definitely that will happen. It is about power of words and a belief of Mother that makes impossible the possible.

Author is sharing his life experience. As a student he was not interested in his studies, but he determined to complete college to become what he wanted to become. But suddenly everything changes. His father faces huge loss in business and becomes a drug addict. Which is a huge loss for author and his family.

But they didn't give up. Author and his father started a restaurant which in 3 months gained a good reputation and started running good. But one day again after an accident happened the business got crashed and father again became a drug addict.

But still they didn't lose hope. As author's mother told him one story, There is one poor lady who asks for food for his family as she knows if she isn't able to manage food for his family today then she may be not able to see them again. So she goes to grocery store and asks for food as a loan. But the shopkeeper asks for one thing that you just write the item you want in a piece of paper and put that piece of paper on a weighing machine. He will give him food equal to the weight of the paper. But the miracle occurs suddenly the weight of paper starts exceeding. So when he reads what was written on that paper it was written that "The god only you know what my need is".

This is the power of belief.

After that author meets with his friend Mr. Amarpreet who shared the business idea with author and after that they do years of hard work and finally get succeeded.

How to do the business is not important but why to do business is more important, What do you want from business is more important.
